

RIBERA DEL DUERO, SPAIN

Ψ Psi

TECHNICAL INFORMATION

PSI is a “neo-cooperative” venture between the partners, and many of the best independent grape growers in Ribera del Duero. A critical element of the PSI project is Peter Sisseck’s desire to preserve the region’s clonal heritage in its old, head pruned vineyards. To that end, Peter has worked with the growers to identify their best, old-clone parcels, and to promote healthier, more natural viticulture.

Established: 2006 (First Vintage: 2007)

Proprietors/Winemakers: Peter Sisseck / Maria Luisa Carretero

Appellation: Ribera del Duero

Soils: Various calcareous clay and sand

THE WINES

	Vineyard & Grapes	Winemaking	Average Production
Ribera del Duero	Multiple growers throughout Ribera del Duero, with an average elevation of ~750m. Sustainable or biodynamic growing is encouraged, with yields <40 hl/hA. 90% Tinto Fino with 10% Garnacha and a little Albillo.	30+ day maceration with punchdown, followed by ~18 months in a mix of used barriques and large wooden tanks.	30,000 cases
